Dr. Victor Marcial-Vega, recognized as being in the top one percent of medical doctors in the U.S., trained at Johns Hopkins University, and was formerly staff radiation oncologist at both the University of Miami and Washington University Schools of Medicine. Dr. Marcial-Vega has done research at the National Institutes of Health (NIH) and the National Cancer Institute (NCI). He has testified before US Congress and presented this technology to numerous medical and professional organizations nationally and internationally including the Radiation Oncology Committee meeting, the American Academy of Anti-Aging Medicine and neurological, nutritional and integrative medicine conferences. He has spearheaded clinical studies and research into this technology.

PSYCHOLOGICAL AND SPIRITUAL RESULTS OF THE TREATMENT

This is only a preliminary report. I saw 105 patients in my clinic. We put each of them into the chamber for a half-hour. We didn't include supplements or dietary advice in the study. They didn't do the ozone chamber or chelation or anything else. My patients reported that they had stress reduction, easier meditation, increased learning capacity, better sleep and increased intelligence. A third of the people had visions. Some people reported a complete healing of chronic conditions after being in the chamber only half an hour. About 85 to 90% of people experience a deep sense of love, relaxation and expanded awareness experiences, tingling sensations, increased libido, removal of negative blocks, clarity of thought and improvement of energy. My patients were coming out of the chamber feeling very happy. Some were crying because they were so happy. Fifteen percent of patients cancelled follow-up treatments because they said they didn't need any more; they were healed. We only use about five to ten percent of our brains. We have seen that the chamber increases the brain capacity. We have done brain scans before and after someone goes into the chamber. Initially there are areas of the brain that are totally shut-off. There is no electricity going through and we can measure this. After being in the chamber those areas start lighting up.
